

Great Gloss,

Now with Deep-Down
Protection

Introducing Polyseal™ **EZ Shield™** Cure & Seal

Now, you don't have to choose between an attractive, glossy sealer that deepens and enriches your decorative concrete, or a penetrating sealer with superior protection but no aesthetic qualities. The new Polyseal **EZ Shield** Cure & Seal from ChemMasters combines the best qualities of penetrating silane to protect stamped, exposed aggregate and decorative concrete with high performance glossy acrylics to deepen and enhance colors and maximize appearance.

Upon application, silane molecules are drawn to, penetrate and coat capillary pore walls where they react with free lime to form a silicone shield.

Concrete Beauty that is More than Skin Deep

Polyseal™ **EZ Shield™** is the cure and seal that works harder, providing high performance penetrating silane protection along with a deep, rich gloss.

Expect more from your decorative concrete sealer. Ask for Polyseal **EZ Shield** by name.

Penetrating Silane	High Performance Acrylic
<ul style="list-style-type: none"> • Maximize protection from damage caused by freeze/thaw cycles and deicing chemicals • Penetrate deeply to protect concrete from within • Long lasting 	<ul style="list-style-type: none"> • High gloss finish • Deepen & enrich colors • Stain protection • Enhanced aesthetic qualities • Cure freshly placed concrete
